

Storyboard for how people accomplish a goal

GOAL: Prepare thoroughly for exams

The paragraph describes the steps of a student preparing for his/her exams.

Firstly, when the exam dates are announced, the student starts to plan a timeline of what the topics are, and how much time is available to study them. Based on that, the student first plans out a clear time table describing all the activities which need to be done for the preparation.

The student has to follow the schedules to do the exams well. He/She then gathers the necessary materials like textbooks, notes and PDFs related to the subjects.

While studying, the student will take note of the important points in a reference book and keeps it handy and formatted. As the exam dates near, the student will then refer to previous year question papers and jots down the important questions. The student will keep track of what has been studied and what needs to be studied. Finally, when the student is done studying and has a clear clarity over all the topics, he/she revises all the topics and refers to the important points which were noted down during studying.

On clearly following these steps, a student can expect to be thoroughly prepared for exams.
